CSUCI's 2018 Stegic Initiatives action item 2.3 calls for the implementation of a waidtepasproach to meet Executive Order 1110 that will ensure that the curriculum, student support, and placement procedures facilitate student success in fixetar placement in which communication and in mathematics/quantitative reasoning. The Executive Order supports faculty innovation in curriculum and facilitates equitable opportunity for first students to succeed through existing and redesigned education models. The Executive Order supports faculty innovation in curriculum and facilitates equitable opportunity for the continued use of traditional assessment measures as well as the introduction of placement indicators based academic performance of students in high school and the Early Start Program.

Based on the charge of the EO0 Implementation Team, these specific aims will be accomplished over a thr year period:

- Make recommendations to inform the redesign of the Early Start Program;
- Make recommendations to ensure that the new curriculum complies with EO 1110 and passe through campus curricular review process;
- Make recommendations to inform the redesign of the first year math experience/quantitative reason including the assessment of the campus' current, stopgap response to EO 1110;
- Make recommendations to inform the design of professional development and training for Early Star first year math experience/ quantitative reasoning instructors, tutors, peer mentors in coordination faculty development structures;
- Make recommendations to facilitate the planning coordination of student academic support networks
